EDUCATION

Thakur College of Engineering and Technology (TCET) | 2025–Present

2nd Year in dept. of Computer Science and Engineering (IoT)

- **Current CGPA – 9.85**

EXPERIENCE

Web Development Intern | Eastton Energy Solutions | Jan 2026 – June 2026

- Developed and maintained responsive web pages, ensuring a seamless user experience across devices
- Contributed to website optimization through design improvements, content updates, SEO implementation, and functionality enhancements

PROJECTS

MessMate – Lunch Made Easy

- Engineered a **real-time pre-ordering platform** with live menu updations, significantly reducing queues and peak-hour congestion.
- Built a secure **token-based** system with live order tracking, preventing misuse and improving transparency.
- Developed a scalable full-stack solution using **React.js** and **Supabase**, deployed on Render, with integrated **Razorpay** payments.

Showcased MessMate at a hackathon, presenting a practical canteen queue solution and receiving positive judge feedback.

PayGen – Payroll & Payslip Generator

- Developed a responsive **payroll management application** using React.js, enabling efficient employee salary processing, management and **payslip generation**
- Implemented **secure employee data management** with Supabase, **authentication**, salary calculations, deductions, and downloadable payslip generation
- Built the application using **React.js**, **Node.js**, **Express.js** and **MongoDB** for payroll management and authentication

Other projects–

- SkyScanner– The Weather App
- OTP Generator
